About us

Dila Tarım started operating in the food sector as a family company and quickly established its identity as a reliable supplier in the sector. Our company, which is based in Antalya, has its production facility in Gümüşsu Neighborhood in Çivril district of Denizli and continues to grow in the field of production and export.

Dila Tarım, which first stepped into fresh fruit and vegetable packaging and export, quickly expanded its experience in the sector with organic products. With its organic NFC (Not From Concentrate) fruit juice production, which does not harm human health and does not contain pesticides, it also produces natural drinks such as orange juice, apple juice and grape juice, in addition to pomegranate juice, red beet juice, black carrot juice, sour cherry juice, especially antioxidant-rich red products.

Our fruit and vegetable juices are obtained with the NFC method and are produced from 1st Class products.

Steps have been taken to produce high value-added organic products from fruits and vegetables with low added value, and pomegranate seed oil production and export have been initiated in order to evaluate pomegranate juice production and waste.

We diversify our product range with oil seeds such as pomegranate seed, grape seed, fig seed, rosehip seed, plum seed, sour cherry seed, apricot seed and black cumin and carrier oils produced by cold pressing from these seeds. We offer all these products to the domestic and global markets in accordance with high quality and hygiene standards.

Dila Tarım aims to be a worldwide supplier in fresh fruit, organic & conventional nfc fruit juice and organic & conventional cold press carrier oil exports.

We base our production processes on European Union standards and continue our R&D studies to increase our organic production capacity and expand our organic product range. Our company has a 75% organic production capacity and is focused on opening up to international markets and gaining more space in global markets.

DİLA TARIM GIDA HAYVANCILIK TAŞIMACILIK SAN. TİC. LTD. ŞTİ

Dila Tarım aims to maintain its leadership in the sector with its quality production approach, customer satisfaction-oriented marketing strategy and innovation-oriented approach that keeps up with the developments in the sector.

Dila Tarım also attaches importance to Social Responsibility Projects (CSR) and carries out national and international studies in this regard.

Our Sustainability and Waste Evaluation Studies

As the Dila Tarım family, we have been acting with the mission of "consuming while producing" since the period we started producing value-added products.

Pomegranate peel, which increases cow milk yield by 37% with its antioxidant substances and energy-giving properties, is one of the two valuable wastes from pomegranate juice production within our business. We sell 50% of the pomegranate peels from our production to be used as feed in the livestock sector. We use 20% of the pomegranate peels, which have a wide usage potential, in organic fertilizer production, and send 15% of them to be used in biofuel facilities; while we send the remaining 15% abroad as dried pomegranate peels to be used in herbal teas.

The other valuable waste from pomegranate juice production is pomegranate seeds, which partially contain pulp. We produce and export pomegranate seed oil from pomegranate seeds dried in the sun after the washing process, using the cold press method. The benefits of pomegranate seed oil, known as the enemy of cancer, are endless and have various uses in the cosmetics sector and as a food supplement in the food sector.

We evaluate the beet and carrot pulps from our vegetable juice-pomegranate juice mixture production to be used in the feeding of slaughtered animals. It is known that it significantly increases meat yield when used in the feeding of slaughtered animals.

WHY DİLA TARIM

BECAUSE “WE” ARE A FAMILY..

As our company vision, we adopt the understanding of human health, animal health, plant health and a beautiful nature in production and trade.

We do not see our customers and consumers as separate from ourselves, we do not offer foods that we do not want to consume.

We supply our products from producers known for their quality in the relevant product groups of our country and deliver them to the plates.

We naturally produce the juice of valuable fruits and vegetables in terms of our country's production potential. Our fruit juices are obtained by directly squeezing the fruit (NFC) and consist of only 100% fresh fruit, containing the juice and aroma of the fruit. In other words, the fruit itself. In addition to flavor, we produce functional products that are beneficial to your health and contain high antioxidants.

Countries We Work With: France, Netherlands, Germany, Poland, England (UK), Austria, Italy, USA, Canada, South Korea, India, China, Japan, Jamaica, African Countries, Afghanistan, UAE
